

The Milwaukee Business Community has turned to Uihlein Electric professionals to define cost-effective electrical and communications solutions for their new or remodeled stores, shopping centers, restaurants, financial institutions and parking structures for the past several decades.

We recognize that in the 21st Century we live with sophisticated electrical equipment and systems that demand the very best in contractor talent. Uihlein has achieved its position as one of the largest electrical contracting firms in southeastern Wisconsin through a commitment to high standards of excellence in our electricians and engineers. We are particularly proud of our experience and knowledge of exacting electrical codes and requirements. In addition to training obtained from NECA and the local union, Uihlein has developed focused training opportunities that we offer to our field forces. These sessions are part of our commitment to ensuring that our people stand at the forefront of the industry in productivity, opportunity, and safety, all to serve our customers in a professional manner.

EXPERIENCE THAT COUNTS

Decades of experience in critical power systems for health care, banking and gaming has made Uihlein and ideal contractor for customers such as Metavante, which is one of the nations largest data processing facilities. High voltage substations, generators, UPS systems, and distribution installed and maintained by Uihlein are the lifeblood of Metavante, a company that relies on unflinching electricity for their existence.

OUR CUSTOMERS SAY...

"Uihlein Electric brought a great deal of knowledge and experience to our project. We were so impressed with their expertise; we were able to continue the relationship through the preventive maintenance program. We're glad we did because they made recommendations to our energy management plan that really made a positive difference."
